DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 3-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Westfall (U.S. 4,000,825). Westfall teaches a container 6 having at least one external thread 10 and a closure 5. The closure has a gasket 13 with raised flutes 25.

Allowable Subject Matter

3. Claims 1, 2 and 8-11 are allowed.

Response to Arguments

4. Applicant's arguments filed June 19, 2003 have been fully considered but they are not persuasive. Applicant argues that Westfall does not teach an aggregate distance spanned that is a sum of the total distance spanned for all of the external threads to be less than an internal circumference of the thread engaging portion. Applicant also argues that this limitation ("an aggregate distance spanned that is a sum of the total distance spanned for all of the external threads to be less than an internal circumference of the thread engaging portion") is made possible by the uneven spacing of the preferred embodiment. It is the examiner's position that the limitation recited above is not limited to closures with unevenly spaced flutes. The flutes of Westfall are evenly spaced, but it is the examiner's position that the closure of Westfall also meets the limitation that "an aggregate distance spanned that is a sum

Art Unit: 3727

of the total distance spanned for all of the external threads to be less than an internal circumference of the thread engaging portion". The aggregate distance of Westfall is less than an internal circumference of the thread engaging portion because the total distance spanned by the points of contact for each thread is less than the circumferential distance spanned by the respective thread.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

6. In order to reduce pendency and avoid potential delays, Technology Center 3700 is encouraging FAXing of responses to Office Actions directly into the Technology Center at (703)872-9302 for regular amendments and (703)872-9303 for after-final amendments. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a USPTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Technology Center 3700 will be promptly forwarded to the examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Niki M. Eloshway whose telephone number is (703) 308-1606. The examiner is in
